States.

What information it has been able to secure goes to show that the gold strike near Osceola is still attracting lots of attention, and with the large amount of precipitation that the region has enjoyed during the winter and spring, it is expected that the big placers will be able to operate extensively this season.

Here in Goldfield the mines are doing better than at any time in their history. The Red Top, Great Bend, Combination and a dozen other properties are taking out and shipping more and richer ore than at any time and new properties are being brought into the producing list with persistent and gratifying regularity. No camp is Nevada is comparable with Goldfield for activity, and the other camps will have to go some if they catch up during the present year.

MANHATTAN, Nev., April 2.—A crew of twenty miners was to-day put to work sacking ore upon the Seyler Humphrey claims—the original discovery in the Manhattan district. While very little accurate information can be secured it is well established that some of the ore which is being hoisted and prepared for shipment runs as high as \$20,000 a ton. Seyler Humphrey, as the original discovery in Manhattan, has to date been the producer of the richest rock which has seene out of the ground in this camp.

While the heavy snow which has covered the mountaits for the last few weeks has somewhat retarded mining operations and made work "on top" almost prohibitory, unusual progress in the face of these adverse conditions has been made. While it is difficult to secure an accurate estimate of the number of producing mines in Manhattan to-day, it is safe to say that high grade shipping values are being hoisted to the surface from at least one hundred different places. Of necessity a good many of these represent leases on some of the leading properties in the

eases on some of the leading properties in the

sand inhabitarts and it is growing richer and higger every day. During the last thirty days every share that has been listed representing a Mauhattan property has appreciated in value from 30 to several hundred per cent. cisted in value from 30 to several hundred per cent.

A very rich strike was made this week on the property of the Marhattan Buffalo, and a crew of miners are tow sacking ore which runs from \$200 to \$1,000. The vein is broadening out and has been proved for a considerable depth. This is one of the most important strikes in the district.

One of the important developments of the week was the decision on the part of Patrick, Ellictt & Camo of Gelifield, who control the Buffalo and combination mines, to build a tea stamp mill for the purpose of handling on the ground the ores of these two properties. An estimate was made during the week of the amount of ore available for milling, and it was found that the rock on the dumps which was displaced by the ordinary course of development without any attempt being made to strip the ground, will keep the mill running for at least six months.

On the Manhattan Red Top's Company's property milling ore has been encountered in the main working shaft and the company

close down the mine until a boarding house and a mill can be erected.

CALIFORNIA.

San Francisco, April 2.—The heavy snowfall in the Sierre Nevadas last month assures California miners of plenty of water for operations until well into the summer. Sixteen feet of snow covers the Sierras, where last year at this time there were only 7½ feet. The heavy rains have also helped all the hydraulic miners in Siskiuck and Trinity, and even on the Mojave desert at Randsburg. The March rains have been of great service. If April and May are cool, the great snow banks will remain unmelted, and California will have a season for mining such as it has not seen for many years.

One of the richest strikes made in recent years in Nevada county was at the Last Chance mine, near Nevada City. A two foot seam of very rich ore was found which assays from \$2.300 to \$5,499 per ton. Some picked samples show values up to \$19,000 per ton. Much of this ore has been sacked and shipped to the smelter. One of the principal stockholders of the company which operates this mine is James Fleming, a well known lumberman of St. Paul, Minn.

Very rich ore has been struck in the Side mine in the Antelope Vailey, Kern county. The ore is free milling and E. M. Hamilton, the owner, is now taking out large amounts. A rush was made from Bakersfeld and all the untested land near by was soon taken up. At the roots of a dead peach tree which he dug up, John Hipp near Georgetown, Kern county, found \$600 in one gold nugget. Hipp had worked the ground all about the peach tree, but he didn't like to kill the tree. When it died, however, he determined to prospect under it and the result was his lucky find. The Gwim mine in Calaveras county is looking better than at any previous period in February the output was nearly \$50,000 and a dividend of 25 cents a share was declared.

Oliver Rodgers & Co. of Boston have secured control of the Lloyd mine at Center Unit was San Andreas. On the sorter than a control of the Lloyd mine at Center under the secure of the secure of

and a dividend of 25 cents a share was de-clared.

Oliver Rodgers & Co. of Boston have se-cured control of the Lloyd mine at Center Hill, near San Andreas. On this property is nearly a mile of the Round Wash channel of blue gravel which is rich in gold.

The old Timbucktoo mine near Smarts-ville, Nevada county, has been reopened lately and will be developed by an Arizona man. The ore runs from \$17 to \$35 a ton, mostly gold, with about six ounces of silver to the ton. COLORADO

COLORADO
COLORADO SPRINGS, April 5.—State Commissioner of Mines E. L. White of Denver, in connection with the State Bureau of Mines, has compiled revised statistics of mineral production for 1905, as follows: Fine Ounces. 1.237.443 12.851.348

The value of the product is based on the market price for the two years, as follows: 1905, gold. \$20.67; silver, .6035; lead, .047; cop-

negotiations were over and the deal was off.

The price asked for this property was \$500,000—an advance of \$300,000 over last season. While doubts are expressed as to the desirability of the iron there is no question among iron men that the mines of Washington, California and Alaska can find nothing to surpass it.

The season in the Cascade Range, while it is opening up exceedingly satisfactory, gives promise of being the best ever known in this section of Washington

The surveyors in the field on the various railroad enterprises confirm the reports of the numerous rich deposits found along their routes and it will be strange if bonanzas are not struck on the new transcontinental lines.

many years, de in recent lance foot seam of assays from cked samples in Much of appear to the stockholders in Much of imped to the stockholders. This mine is imberman of in the Side for county is more than \$10,000,000 to its credit; after going through these years without protest from its neighbors, the Silver King Mining Company of Park City, with ex-Senator Thomas Kearns and David Keith at its head, has finally got into trouble. James McGregor, through the last about the whole thing, has filed and allon taken up a tree which getown, Kern larget. Hipp ut the peach is to prospect is lucky find. It is learned to demands and the secret and unlawful expending stree. When it to prospect is lucky find. It is learned to day that workings, and learned that the trespass had occurred. It is learned to-day that workings, and learned that the trespass had occurred. It is learned to-day that workings, and learned that the trespass had occurred. It is learned to-day that workings, and learned that the trespass had occurred. It is learned to-day that ware been taken from other portions of his property. David Keith, president of the Silver King company declares that his compendately surround the service of the property surrounds the Silver King to more than \$10,000 the Silver King to Thomas F. Coles.

developed during the past week, but indications point to important disclusives shortly.

MONTANA.

BUTTE, Mont., April 3.—The East Butte Mining Company now has ten sets of lessees at work in the various properties of the company and from the royalties received from them the company has during the last two months derived a good net income after paying for all development work, extensive improvements, salaries and office expenses. The lessees in No. 2 a few days ago cut, at a depth of 140 feet, a body of copper slance running 80 per cent. copper. It is two feet wide and is the same vein cut some time ago in the Symons mine of the company, 300 feet northwest of No. 2 and at a depth of 200 feet. In the Symons the rich streak is four feet wide. The company has completed its three compartment shaft on No. 1 to a depth of 350 feet. The shaft was originally of two compartments and was erlarged from the bottom to the top, the surface just having been reached. The coming week sinking will begin from the 350 foot level and a depth of 1,000 feet will be reached some time during the coming fall.

When a depth of 500 feet is reached, which will be some time in the latter part of June, a cross out will be run through the entire length of the company's ground north and south and all the veins, about twenty-one, will be opened. The company will then begin stoping and mining from that depth upward to the present upper workings and will have from 200 to 250 feet of stoping ground, which will make it possible to hoist and ship about 500 tons of ore daily. The most encouraging indications of the continuity of the ore bodies are the facts that they are widening with depth and the copper glance is found in larger quantities. The new shaft are expected to arrive very shortly, as they have been on the way for several weeks. The company will build the new hoist over the old machinery while the new is being put in place. The plans are to sink another shaft at the extreme southern end of the company's ground and connect it by underground

and the other is concentrating ore and goes to the concentrator of the East Butte company.

By striking a rich body of ore in the Snoozer mine at a depth of 1,500 feet the Raven Mining Company enters the list of big copper producing companies in the Butte district. The company for several months has been developing the vein on the 1,200 foot level and flas taken out a lot of ore during the progress of development. While the work was going on on the 1,500 station and it cut through one vein 30 feet wide and during the past week it also cut the other vein, known as the north vein of the Snoozer. The ore body at that a verages for the entire width 7 per cent. Copper, 15 ounces of silver and \$1.50 in gold to the ton. Several feet of the vein run as high as 30 per cent. Copper and \$5 ounces in silver. The little driffing that has been done on the vein indicate that the ore body will be found continuous and the Raven will be found continuous and the Raven will have from 700 to 800 feet of length along the vein from the cross cut to the east end line of the Snoozer. The developments on the 1.200 have also demonstrated that large amounts of copper ore will be extracted between that level and the surface. In addition to the north vein the company is distingting on the south, or discovery vein, both on the south

THE HOTEL RUSSELL London

ATTRACTS THE Aristocracy of the States

Ideal location for the tourist visitor. Within easy reach of all places of amusement, public buildings, in the very centre of the town, close to the leading railway termini and British Museum, yet enjoying a quiet situation well removed from the noisy traffic. On high ground, overlooking the well-wooded grounds, verdant lawns and carefully tended gardens of historic Russell Square, ensuring composure at night amid quiet surroundings and bracing air.

The Hotel Russell is internally arranged on the American Plan, with a magnificent winter garden in the very centre of the house, from which all public apartments converge. This garden, during the season, is the rendezvous of the fashionable American, and scene of brilliant functions and social

gatherings.

The bedroom accommodation at the Hofel Russell is luxurious in the extreme, probably without equal in Europe.

WELL-DISCIPLINED SERVICE CUISINE IS WORLD-FAMED The charges of the Hotel Russell, as with the whole group of the re-

nowned Frederick Hotels, are extremely moderate.

TARIFFS CAN BE OBTAINED FROM THE TOWN & COUNTRY TRAVEL BUREAU.

289 FOURTH AVENUE, NEW YORK CITY.

Other Hotels of the Famous Frederick Group comprise: THE ROYAL PAVILION HOTEL, at FOLKESTONE, on the main route from London to Paris, adjoining the harbor landing stage.

THE HOTEL BURLINGTON, DOVER, the finest hotel on the Dover-Calais route to Paris, and commanding a position overlooking the whole sweep of Dover Bay.

THE SACKVILLE HOTEL at BE XHILL, the most elegant hotel at the daintiest water.

ing place on the South Coast.

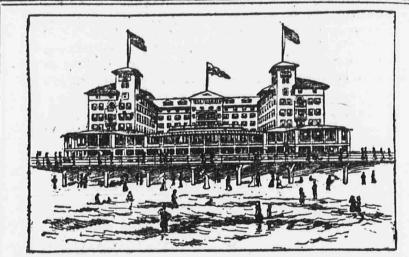

THE HOTEL MAJESTIC AT HARROGATE, the leading hotel at this the most fashion able of English Spas, annually becoming more popular with the travelling American.

THE HOTEL METRO POLE AT WHITEY, well-known as the "Harrogate after-cure resort" Hotel. that there is apparently no limit to the depth at which good copper ore exists in the Butte district. The Anaconda company has opened three veins on the 2,000 foot level, including the big one which was opened on the 2,200 about three months ago and caused a sensation among the stockholders and investors.

The Butte Copper Company is shaping affairs for active work on the Emmet mines. The company will sink a three compartment shaft 1,000 feet deep, the work to begin where the lessees quit some time ago, at a depth of 300 feet. At that point a large copper vein was cut.

The Butte & Bacorn Company is making rapid progress on its three shafts north of Butte. The Butte men interested in the enterprise are enthusiastic over the showing already made and the prospects for opening a rich copper producer.
